■ PROTECTION CIRCUITRY

The protection circuitry may have operated if either of the following conditions is noticed:

- No sound is heard when the power is turned on.
- Sound stops during a performance.

The function of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of this unit are used.

If this occurs, follow the procedure outlines below:

1. Turn off the power.
2. Determine the cause of the problem and correct it.
3. Turn on the power once again after one minute.

Note

When the protection circuitry functions, the unit will not operate unless the power is first turned off and then on again.

■ BEFORE REPAIR AND ADJUSTMENT

1. Turn off the power supply and short-circuit both ends of the power supply capacitors (C701, C702, 4700 μ F) with a resistor (about 10 Ω , 5W) to discharge the charged voltage. Do not short both ends of C701 and C702 with a screwdriver. It may damage the component.
2. Before turning on the power supply after completion of repair, slowly apply the primary voltage by using a power supply voltage controller to make sure that the consumed current is free of abnormality. The consumed current at 50Hz in no signal mode is shown below with respect to supply voltage 220V/240V.

Power supply voltage		AC220V	AC240V
Current consumed	50 Hz	50 ~ 150mA	40 ~ 120mA

LOCATION OF CONTROLS

- Phono input capacitance is about 150pF.
- Series connection method is employed for the main and remote speaker connections of this set. Therefore, if both speaker changeover switches (main and remote) are turned "on" with the speaker unit connected only to main or remote speaker terminal, then no output signal will be delivered from the speaker unit.
- The power supply for this unit varies depending upon the areas.
Also, the parts used for power supply are different.
 - * 220V(50/60Hz) for continental Europe.
 - * 240V(50/60Hz) for United Kingdom.

DISASSEMBLY INSTRUCTIONS

Ref. No. 1	How to remove the cabinet	Ref. No. 2	How to remove the bottom board
Procedure 1	• Remove the 6 setscrews. (① ~ ⑥)	Procedure 2	• Remove the 10 setscrews (⑦ ~ ⑯)
			
Ref. No. 3	How to remove the front panel	Ref. No. 4	How to remove the power amplifier IC
Procedure 1 → 3	1. Remove the 3 setscrews. (⑰ ~ ⑱) 2. Release the 5 claws.	Procedure 1 → 2 → 4	1. Remove the 2 setscrews. (⑲ , ⑳) 2. Detach the power transformer from rear panel in the direction of arrow A. 3. Unsolder of power amplifier IC. 4. Remove the 2 setscrews. (㉑ , ㉒)
 		 When mounting the power amplifier IC, apply silicone compound (SZZ0L15) to the rear side of power amplifier IC, and then follow the steps 1 ~ 4 reversely.	

Ref. No. 5	How to remove the slide volume
Procedure 1 → 5	1. Set the dial to the start position (minimum frequency), then stick a cellophane tape the contact (B) of dial cord so that the dial drum will not come loose from the dial cord. 2. Remove the 1 setscrew. (22) 3. Remove the dial cord from the pulley. (C)

Cellophane tape

1. The claws projected (at 4 portions) from the slide volume printed circuit board are engaged with the slide volume.
2. Disengage the claws from by screwdriver of the like to remove the slide volume case.
3. Unsolder the slide volume.

• Remove the front panel in the direction of the arrow.

DIAL CORD INSTALLATION GUIDE

- When setting the cord, follow the procedure given below
1. The cord should be at least 180 cm long.
 2. Completely turn the tuning gang (variable capacitor) counterclockwise. (Variable capacity : max. Frequency; min.) max. Frequency; min.)
 3. Make a knot at the cord and as shown in Fig. 1
 4. Set the spring to the knot, and set the cord in the order of 1 - 10.
- Note: At step 7, pull the cord strongly, slacken the spring up to the mark of the drum, then go to steps 9 - 10 to set the cord.
5. Fix the cord terminal with adhesive.
 6. Cut off the cord about 5 mm at its either end.

RESISTORS & CAPACITORS

- Notes:**
1. Part numbers are indicated on most mechanical parts. Please use this part number for parts orders.
 2. Important safety notice: Components identified by Δ mark have special characteristics important for safety. When replacing any of these components use only manufacturer's specified parts.
 3. The "S" mark is service standard parts and may differ from production parts.
 4. The unit of resistance is Ω . (ohm) K=1000 Ω , M=1000k Ω .
 5. The unit of capacitance is μ F. (microfarad) P=10⁻⁶ μ F.

- Notes:**
- Part numbers are indicated on most mechanical parts. Please use this part number for parts orders.
 - Important safety notice:
Components identified by **Δ** mark have special characteristics important for safety.
When replacing any of these components use only manufacturer's specified parts.
 - The "Ⓢ" mark is service standard parts and many differ from production parts.
 - Bracketed indications in Ref. No. columns specify the areas. Parts without these indications can be used for all areas.

Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.

11. Important safety notice : Components identified by Δ mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.

Note 2: Muting switch part. It is positioned as shown only for a moment it is switched. Usually, it is not connected to the circuit.

REPLACEMENT PARTS LIST (Cabinet and Chassis Parts)

- Notes:**
1. Part numbers are indicated on most mechanical parts. Please use this part number for parts orders.
 2. Important safety notice:
Components identified by Δ mark have special characteristics important for safety.
When replacing any of these components use only manufacturer's specified parts.
 3. The "S" mark is service standard parts and many differ from production parts.
 4. The parenthesized numbers in the column of description stand for the quantity per set.
 5. Bracketed indications in Ref. No. columns specify the areas. Parts without these indications can be used for all areas.
